## DETAILED ACTION

### *Election/Restrictions*

1. Claims 1-3 9, 16, 17, 23, 26, 31, 35, 45, and 49 allowable. The restriction requirement between Species 1-16, as set forth in the Office action mailed on 10/19/2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 4-8, 10-15, 18-22, 24-25, 27-30, 32-34, and 46-48, directed to a non-elected species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### *Allowable Subject Matter*

2. Claims 1-35, and 45-49 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-35 and 45-49 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "an electroactive polymer actuator coupled to the housing and configured to output a haptic-feedback force associated with the output sensor signals". In claim 16, "an electroactive polymer actuator coupled to the device and configured to output a haptic-feedback force associated with the output sensor signals". In claim 26, "an electroactive polymer (EAP) element coupled to the housing and configured to output a haptic-feedback force associated with output sensor signals". In claims 31 and 45, "outputting a haptic-feedback force,

Art Unit: 2629

the haptic-feedback force being generated by a deformation of an electroactive polymer actuator, the haptic-feedback force being based on input signals to the electroactive polymer actuator”.

The closest prior art Kornbluh et al. (6,586,859) is directed to animated devices comprising one or more electroactive polymers, however singularly or in combination fails to anticipate or render the above underlined limitations obvious. Furthermore, Kornbluh et al. (6,586,859) claims priority to Provisional Application 60/194,817 filed 4/5/2000. However, this earlier filed Provisional Application has no proper support for the subject matter in U.S Patent Number (6,586,859) as required by U.S.C. 119 (e), and as argued by applicant in the REMARKS filed 9/5/2006. Therefore, Kornbluh is no longer being considered as prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
